## Recent Exciting News from Davos!

**We are thrilled to announce that Open Origin has signed a monumental Memorandum of Understanding (MOU) with the Government of Maharashtra, India, to build a cutting-edge green ammonia production plant in the region. This landmark agreement was signed yesterday by Open Origin's founders, and Ashish Saraf (Chairman of Open Origin India), with Maharashtra's Chief Minister Devendra Fadnavis, during the 2025 in Davos.**

**Key Highlights of the MOU:** Investment Scale: ₹15,000 crore (\$1.8 billion USD)

**Project Capacity:** 720,000 tons of green ammonia annually (matching our Salinas Puros, New Mexico plant)

**Employment Creation:** 1,000+ direct jobs in green energy Support from Maharashtra: The state will provide land, water, and essential infrastructure, while also securing a government offtaker for 100% of production for the next 20 years.

**Open Origin's Role:** Fundraising, project development, and operational management of the plant.

This transformative project underscores Open Origin's commitment to accelerating the green energy transition, building sustainable infrastructure, and creating economic opportunities for local communities. A special thank you to the Chief Minister and the Government of Maharashtra for their leadership and collaboration. This partnership marks a major step in driving innovation and clean energy solutions for the future.

Stay tuned as we share more updates on this exciting journey!

## Latest News

### Advancements showcased breakthroughs in green energy for supercomputing & AI

Open Origin has been featured in a press release by Advancements with Ted Danson, highlighting our new episode on our innovative strides in renewable energy infrastructure. As leaders in the development of purpose-built solutions for green AI and supercomputing, our efforts are not only meeting the global energy demand but also addressing critical U.S. supply chain challenges.

Join us on this journey as we continue to pioneer the future of energy! [Check out the full press release.](#)

### Meet the Open Origin Team at Supercompute!

*November 17-21, 2024, Atlanta.* Join us at #SC24 to explore how Open Origin's green supercomputing can support your AI and scientific research while meeting your sustainability goals. Our Supercomputer-as-a-Service model provides GPUs, storage, CPU, RAM, connectivity, and renewable energy on demand—optimized for high-performance, sustainable computing. Contact us: [sales@OpenOrigin.industries](mailto:sales@OpenOrigin.industries)

### **Meet Open Origin's Founders and Partners on Advancements TV with Ted Danson**

Open Origin is featured on the award-winning Advancements TV show with Ted Danson, which aired on Bloomberg TV. The segment showcases our clean data center power solution, with interviews with founders Wesley Powell and Indrani Pal-Chaudhuri, and our partners at Erthos and Nexans.
